An experienced software developer, I am passionate about delivering the best and most seamless computing and UX experiences to all users. My technical skills, backed up by my academic record, have been instrumental in my business success. I am communicative, attentive to detail, and looking forward to embarking on new challenges.

Work Experience

Frontend Engineer

S2 Global - Fort Lauderdale, FL
October 2022 to Present

S2 Global delivers screening solutions that result in dramatic improvements in areas such as operational efficiency, security, compliance, revenue collection, and trade facilitation. As a Frontend Engineer for S2, I have worked on several projects, some of the most interesting include:
- Development and maintenance of image analyzing software highlighting suspicious contents in various types of x-ray imaging scans from transport containers. Software is utilized at various customs ports as well as airports across more than 10 locations in Albania and Qatar.
- Modification and implementation of various online learning management system (LMS) functionalities supporting over 50,000 users.
- Designed and implemented a comprehensive platform for efficient management of employees' schedules and tasks.

Web Application Developer

Division5 – Tirana, Albania
January 2022 to September 2022

Division5 is a software outsourcing company based out of Albania as well as Germany. Division5 provided numerous web, mobile, and gaming solutions to various clients acrossEurope. As a Web Application Developer, I worked on the following projects:
- Online platform for electric vehicle charging stations across Germany. I was responsible for various updates and modifications as requested by the client.
I was responsible for modifying any component within the Model-View-Controller
(MVC) web application architecture.
- Ticket and event-management platform for a client in Italy. I was responsible for implementing the payment and transaction processing system as well as the management of the tickets (reserving / buying/canceling).

Software Developer

CloudLMS Inc -Toronto, ON
March 2022 to December 2022

CloudLMS Inc. is a Canadian company focusing on compliance courses as well as train-the-trainer initiatives. Its modular design allows the LMS to grow and be customized to any organization's needs.As a contract software developer, I was responsible for:

- Implementing various course management functionalities while improving student and teacher workflows. I was also responsible for resolving bugs as well as performing QA activities for other developers' deliveries.

Web Developer

Commit Software Sh.p.k - Tirana
June 2019 to December 2021

Commit Software is an Italian company contracted out as a full turnkey software engineering firm providing full-stack software development solutions to its clients. As a Web Software Developer, I worked on the

following projects:

- A full-scale eStore solution where customers could go through the order management process ultimately checking out with items shipped to their homes.
- Online survey and online promotions system for different companies including Carrefour (one of the largest European grocery store chains.
- POC (Proof-of-Concept) for a hospital patient management platform. This POC demo'ed functionalities such as booking appointments with patients as well as storing patient profiles as well as their medical histories.
